《香港鳥類生態 - 英文版》

本書由研究香港鳥類多年的專家編寫，涵蓋多方面本地鳥類生態知識。內容提及生活在各種生境包括人工環境的鳥類知識，同時也闡述了禽流感與及氣候變化對本地鳥類可能帶來的影響。讀者將會發現，香港雖然是世界上人口稠密的大城市，但仍然有很多鳥類在此棲息！

Ecology of the Birds of Hong Kong

This book brings together many diverse aspects of bird ecology in Hong Kong. The chapters are compiled by experts who have diligently studied their subjects across the many habitats available to local species, including man-made landscapes. It contains the wide collective knowledge and experience that the authors have developed through years of study. The book also addresses special topics including avian influenza and the probable impacts of climate change on local birds. It may surprise readers to learn how rich our avian fauna is in Hong Kong and how many species survive so close to one of the most densely populated places on Earth!
