Pictorial Guide Book of KFBG Plants (Revised Edition)

The scenery at KFBG changes with the seasons. Depending on when you visit, you will find trees and plants are either blossoming, fruiting, changing colour, or losing their leaves. The scenery is beautiful no matter what season it is!

At KFBG, more than 1,500 species of plants thrive all year round, including those native to the hillside and ornamentals planted in gardens. Amongst these, over 140 species have been selected and compiled into this book. They are mainly located in areas where visitors will usually explore and along the roadsides. This book provides a reader-friendly account on biological and special features of our plants and hence makes your visit more enjoyable. We also hope that it will arouse you to appreciate, treasure and care for nature and the natural environment.

This Guide Book is available in our Farm Shop at HK\$40.
