

What can you find in "Organic Farming Display" and "Eco-garden"?

Draw any items (on the left hand side) on the following picture.

Honeybees and butterflies help pollinate flowers. Pollination helps plants make fruit and seeds.

Scarecrows, reflective foil strips, and big ball. Big eyes help to scare away birds from the fields to stop them eating vegetables.

Compost Basket

Compost is a fertilizer that is made from natural materials. Do you see the compost baskets?

Seedlings are baby plants. Do you see any?

Can you recognize any vegetables on the farmland?

What kinds of methods are used to control pests?

Can you identify cause and effect relationships in agriculture which also relate to environmental issues?
